

## NSE Module Offerings

### **Hospitality Module: PMS System Interfaces – Flyer Supplement**

The following is a list of PMS systems that interoperate with the Nomadix Service Engine (NSE).

#### **INTERFACE PROTOCOL**

A large number of PMS systems have been interfaced with NSE. Nomadix emulates Micros (1700 / 2000 / 3700 / 4700 / 8700) System Software using the Fidelio FIAS Opera (Serial, TCP/IP and Query/Post) Interfaces.

Nomadix also offers the following standards-based interfaces, generally used to establish an interface to any of the PMS systems that are not proprietary:

- HOBIC-RSI
- HOBIC-TSPS
- HOBIC-1BT2
- HOBIC-TEST
- HOBIC-OSPS

#### **INTEROPERABILITY**

Nomadix has verified the interoperability of the Nomadix Service Engine with a variety of Property Management Systems including:

- |                                 |   |
|---------------------------------|---|
| ○ Encore                        | ○ Maestro   |
| ○ FCS                           | ○ Marriott  |
| ○ Galaxy (GEAC)                 | ○ Megasys Hospitality Systems                                   |
| ○ GuestView                     | ○ Micros Fidelio FIAS (Serial, TCP/IP and Query/Post interface) |
| ○ Hilton 1                      | ○ MSI   |
| ○ Hilton 2                      | ○ NH Hotels   |
| ○ Holodex (AutoClerk)           | ○ OnQ   |
| ○ Hotel Info Sys (HIS)          | ○ Protocol Technologies   |
| ○ Igets.net                     | ○ Ramesys ImagInn PMS   |
| ○ Innquest                      | ○ Springer-Miller   |
| ○ Innsist (emulate MICROS 2700) | ○ Xeta Virtual XL   |
| ○ LanMark                       |   |
| ○ LIBICA                        |   |
| ○ Logistics                     |   |
