

## How to Replace the Nomadix Logo Displayed on the Default Login Pages

To change the logo that appears on the Nomadix login screens, you will need to FTP your additional image to the /flash/ directory of the Nomadix Gateway. See “How To FTP to the Gateway.pdf” if you are not sure of this process. Login to the Nomadix Gateway and navigate to Subscriber Interface then Login UI. Enter the image file name previously uploaded in the text box for **Image File Name** and reboot the Nomadix Gateway.

Additionally, you can change the page and table background colors by entering in either the hex code or HTML color name, as well as the font to be used.

Image File Name	<input type="text" value="image.gif"/>	
Page Background Color	<input type="text" value="white"/>	<a href="#">View Color Grid</a>
Table Background Color	<input type="text" value="#E0E0C2"/>	
Page Title Font	<input type="text" value="Verdana"/>	
Line Item Font	<input type="text" value="Verdana"/>
