

## Nomadix Internet Access Gateway Supplies Huntingdon Racecourse with Dependable, Secure Internet Access

### ABOUT HOLIDAY INN, HUNTINGDON RACECOURSE

The Holiday Inn, Huntingdon Racecourse, is a 98-bedroom hotel from the worldwide hotel brand on the edge of the Huntingdon Racecourse in Cambridgeshire. Regular clientele include both racing patrons and business users who require the hotel's corporate hospitality and conferencing facilities.

### CHALLENGE

Given the diverse and consistent needs of the clients at the Holiday Inn, Huntingdon Racecourse, the need for a solid, reliable wireless Internet network was paramount. The hotel also required a certified integration between the Nomadix software and the Holiday Inn PMS, which would mean that the hotel no longer had to service guests with user accounts individually. Guests would have access to the network by simply using their surname and room number, rather than going through hotel access codes.

“The [Nomadix] guest Internet solution services the corporate market perfectly, and allows businesses to provide seminars and conferences on-site before making their way across for an afternoon or an evening at the races. What more could you ask for?”

– Jake Scannell  
MICRON COMMUNICATIONS

**SOLUTION**

Micron deployed the Nomadix AG 2400 access gateway and a network of Cisco wireless access points to provide blanket wireless Internet access throughout the hotel site. Micron also utilized cutting-edge iNAT™ technology, allowing the support of corporate VPN users — a unique selling point to business travelers. iNAT allows for the translation of secure company VPN settings through a public gateway.

In integrating these technology and network solutions with its radius portal, Micron can deliver on its commitment to providing seamless, user-friendly Internet access to both the hotelier and the guests.

**RESULTS**

Bringing in the Nomadix AG 2400, enhanced with hospitality features, will not only assure the Holiday Inn, Huntingdon Racecourse, that their guests can enjoy fast, reliable and secure Internet access, but that guests can, indeed, self-register onto the appropriate network.

“I don’t think any of us would ever sleep again if we thought that an Internet failure had stopped someone placing their life-changing bet online, so we had to get this one right!”

– Jonny White
