

Purpose: To enable Credit Card Billing with Six Card Solutions using the Internal Web Server of the NSE.

Before configuring the gateway for credit card billing you will need to obtain the following information from Six Card.

**eMerchantID
ValidationCode**

Step 1: Add web2pay.3cint.com to the Configuration/Passthrough Address list.

Passthrough Address Settings

Passthrough Addresses Enable

Submit

Please enter either an IP address or a DNS name and click on one of the provided buttons.

Note: DNS name should not contain protocol, port, or path information.

Up to 300 Passthrough Addresses can be entered.

IP/DNS Name:

Add

Remove

Step 2: Enable AAA, New Subscribers, Credit Card Billing and Transaction Key

Enable Use NSE's hostname and Domain name if you want to use the DNS name for the NSE instead of its IP address. **NOTE:** Please verify that the NSE responds to the DNS name before using this setting.

You will Select Authorize.net as the Credit Card server.
The credit card server url will be given to you when you create your account.

The following is an example of the credit card url.

Production:

https://web2pay.3cint.com/iPage/Service/_2006_05_v1_0_1/service.aspx?emerchantid=eMerchantID

For Merchant ID, enter your eMerchantID, ValidationCode

For the Transaction key, enter xx.
MD5 hash value can be left blank.

Internal Web Server
